Galil Software is a software service company located in Nazareth. By recruiting from the highly skilled workforce available in the Galilee, Galil Software is uniquely positioned to offer high quality services at competitive prices. In addition, Galil Software's proximity to major Israeli high tech centers ensures that customers have direct and continuous access to our R&D teams, significantly reducing the risk, cost, and management attention required to support off-shore outsourcing activities.

Galil Software customers include companies that require turnkey projects; companies wanting to outsource and significantly reduce their R&D costs; and companies looking for Arab language and customization services.

Galil Software can manage complex projects through the entire development cycle, from problem definition and system design, to detailed engineering, software development, integration and testing and post delivery support.

Galil Software is led by an experienced Management Team:

- Inas Said, the CEO of Galil Software has more than 15 years of development experience with leading European, US, and Israeli companies such as Nokia, Ericsson, Stratus and ECI.
- Bassel Khoury, has more than 15 years of experience in large IT companies (IBM, Intel UK). In his most recent position at Dalet Co. he managed the projects and professional services group.

The Board and Investors of Galil Software include Zeev Bregman (Chairman), Jimmy Levy (Founder), Elias Tanous, Itzik Danziger, Oren Zeev, Shai Reshef, Adam Parnas, Adi Pundak, Gad Hitron, Lior Berger, Eyal Goldwerger, Ailon Michaely, and The Arledan Group.
